TANGIPAHOA WATER DISTRICT

WATER USERS AGREEMENT

This agreement, between the TANGIPAHOA WATER DISTRICT, a water district hereinafter call the District and X _____, hereinafter called the Customer.

WITNESSETH

Whereas, the Customer desires to purchase water from the District and to enter into a water user's agreement as required by the WATER DISTRICT BOARD OF COMMISSIONERS.

Now therefore, in consideration of the mutual covenants, promises, and agreements herein contained, it is hereby understood and agreed.

The District shall furnish, subject to the limitations set out in the Established policies of the District, and those hereinafter provide for, such as quantity of water as the customer may desire in connection with his occupancy of the following described property.

The customer hereby grants the District, its successors or assigns, a perpetual easement in, over, under, and upon the above described land with the right to erect, construct, install, and lay, and thereafter use, operate and inspect, repair, maintain, replace and remove water pipelines and appurtenant facilities, together with the right of egress over adjacent land for the purposes mentioned above. The width of said easement shall be not less than 10' from the road right-of-way.

The Customer shall install and maintain, at his own expense, a service line, which shall begin at the meter and extend to the dwelling or place of use. The service line will connect with the distribution system of the District at the nearest place of desired use by the Customer, provided the District has determined in advance that the system is of sufficient capacity to permit deliver of the water at that point.

The Customer agrees to pay for water at such rates, time, and place as shall be determined by the district, and agrees to the penalties for noncompliance with the above as set out in the current established policies of the District.

The District shall purchase and install a cutoff valve and will also include a meter in each service. The District shall have exclusive right to use such cutoff valve and water meter. The District shall have final jurisdiction in any question of location of service line connection to it's distribution system; shall determine the allocation of water to customers in the event of a water shortage; may shut off water to a Customer who allows a connection or extension to be made to his service line for the purpose of supplying water to another user. In the event the total water supply shall be insufficient to meet all of the needs of the Customers, or in the event there is a shortage of water, the District may prorate the water available among the various Customers on such basis as is deemed equitable by the BOARD OF COMMISSIONERS, and may also prescribe a schedule of hours covering the use of water for garden purposes by particular Customers and require adherence thereto or prohibit the use of water for garden purposes. If at any time the total water supply shall be insufficient to meet the needs of all Customers, the District must first satisfy all of the needs of all Customers for the domestic purposes before supplying any water for livestock purposes and before supplying any water for garden purposes.

Should the District become aware of a leak in the Customer's service line, the need to repair such leak will be communicated to the Customer verbally, or in writing at the address where Customer receives the water bill. Should the Customer fail to repair the leak within ten (10) days following the receipt of notice of the

need to repair, the District without further notice may disconnect the Customer's service. It shall be presumed notice in writing has been received by the Customer by 4:00 p.m. on the 3rd day following the date any notice is given in writing.

The Customer agrees to comply with the requirement of the Louisiana State Board of Health that no other present or future source of water will be connected to any water lines served by the District's water lines and will disconnect from his present water supply prior to connecting and switching to the District's system.

The Customer shall connect his service lines to the District's distribution system and commence to use water from the system on the date that the water is available to the Customer by the District. Water charges to the customer shall commence on the date that the service is made available.

The acceptance of a deposit by the District is not to be construed as the consideration or cause of a contract or agreement between the District and the customer.

Any agreement or decision by an employee of the District pertaining to initial delivery of water services communicated to a potential customer is subject to the policies in force and effect of the District's board of commissioners and is subject to review and override by the District's manager and/or board of commissioners.

The failure of the customer to pay water charges duly imposed shall result in the automatic imposition of the following penalties:

- (1). Nonpayment as of the due date will be subject to a penalty of ten (10) percent of the delinquent account.
- (2). If the balance is greater than \$50.00, or more than 90 days in arrears and not paid by the due date, service will be disconnected without notice.
- (3). In the event it becomes necessary for the District to shut off the water from a Customer's property, a re-connection fee of \$25.00 will be charged to restore service. The Customer may also be required to update the deposit before service will be restored.

IN WITNESS WHEREOF, we have hereunto executed the Agreement this ___ day of _____, _____ in duplicate of original. (Revised 09/19/06)
